

You are interested in the prevailing global challenges of our time? You wonder about questions on how we want to live in the future? You are keen to break through existing system constraints, work through transdisciplinary engagement and connect the dots for sustainable change?

The **new master's program Environment, Climate Change and Health (ECCH) at the University of Bayreuth** directly aims to address current issues and questions of the 21st century and provides answers and solutions to global climate and environmental challenges. We set our targets high and educate a new generation of pioneers of change equipped, skilled and enthusiastic to address the planetary crisis and shape a healthy and just future for all - today and tomorrow.

**The ECCH master's program invites all students, experts, practitioners, and researchers to an online**

**Transdisciplinary Lecture Series  
Planetary Health - Connecting the Dots**

to gain broad knowledge of causal relations between environment, climate change and health based on an integrative, transdisciplinary perspective including natural science, economics, jurisprudence and social science- the right basis to educate future pioneers of change. During the lectures you will hear from international experts from various disciplines joining forces, connecting the dots for a healthy planet.

**When:** Thursdays, 4-6pm CET, starting 20<sup>th</sup> April, 2023
